## Description

The 100BASE SFP transceiver is a high performance, cost effective module with a duplex LC optical interface. It can be used for high-speed signals, LVTTTL control and monitoring of signals with standard AC-coupled CML.

The receiver section uses a PIN receiver and the transmitter uses 1550 nm DFB laser, and the 20dB link budget ensures this module SONET OC-3/SDH STM-1 80Km application.
